# Digital Operations

Dear Developers,

The public CA signer of the server certificate will be changing for both of the following endpoints:

- provider.api.acc.co.nz (To be updated on the 7th August)
- api.acc.co.nz (To be updated on the 4th August)

The current signer of these certificates is "CN=Thawte RSA CA 2018".

The new signer of these certificates will be: "CN=Thawte TLS RSA CA G1".

Please make sure that your configuration is set up to still trust these endpoints, once the change is made.

Ngā mihi

ACC Digital Operations
