prevention. care. recovery.

Digital Operations

Kia ora whānau,

Emailing today to inform you that last week we released a minor, non-breaking version update to our [Medical Certificate](#) and [Change of Diagnosis](#) APIs.

What has changed?

We have made the following update to align these products with functionality we released for the Claim Submission API in September 2023.

- Allow the additional diagnosis side location 'Bilateral' to be used for an Injury diagnosis (in addition to Left, Right and Not Applicable)

For our existing customers of the Medical Certificate and Change of Diagnosis APIs, we encourage you to prioritise adopting the latest versions of these endpoints.

For more information

- Updated swagger files are available here: [Medical Certificate](#) / [Change of Diagnosis](#)
- The updated Common (Core) API software specification document is available [here](#)

Any questions?

Please reach out to Digital Operations at digitaloperations@acc.co.nz who can provide further information.

Thanks,

Nathan Bramley
