Recipient: Guided Injection requests (accprapr)

Patient details

First name: [REDACTED]

NHI number: [REDACTED]

Last name: [REDACTED]

Date of birth: [REDACTED]

ACC

ACC45	Date	Work Related	Location	Details
[REDACTED]	23/ 12/ 2019	No	[REDACTED]	stumbled using crutches and twisted L hip and jarred both shoulders trying to stop fall

Additional Information

Comments:

Date: 12/02/2021 09:13:29 Right shoulder pain has recurred. He had a steroid injection into this in March of last year and has just started coming back.

Keen for further injection so I have applied to ACC for funding.

Diagnostic Reports / Patient Documents - Steroid Injection Ultrasound

Patient Details

Patient Name: [REDACTED]

NHI No:

Date of Birth: [REDACTED]

REPORT:

STEROID INJECTION ULTRASOUND

INDICATION

Ongoing severe pain. For ultrasound-guided injection.

FINDINGS

Complete tear of supraspinatous, which is retracted medially.

Consent for infection, pain, bleeding/bruising and allergy.

Under ultrasound guidance the right subacromial space was injected with 40 mg Kenacort and 7 ml 1% ropivacaine using a 22-gauge needle.

No immediate complications.

CONCLUSION

Ultrasound guided steroid injection of the right subacromial space.
